

T.SANTOSH KUMAR

Visakhapatnam, Andhra Pradesh

+91 8309748238 — ktsantosh5@gmail.com — LinkedIn — GitHub

Education

Vignan's Institute of Information Technology

B.Tech in Computer Science and Engineering — CGPA: 8.9

2022 – 2026

Visakhapatnam

Internship

Infosys

MEAN Stack Developer Intern

Mysore, India

Dec 2025 – May 2026

- Contributed to development of an internal intern workflow management system using the MEAN stack, focusing on modules such as leave requests, resignation management, project progress tracking, daily Updates and profile management.
- Worked on both frontend (Angular) and backend (Node.js + Express.js) for building REST APIs and interactive dashboards for intern activity tracking.
- Implemented role-based access control (RBAC), SSO(Single Sign On)-based authentication, and MongoDB schema design for structured and secure data handling.

Projects

Student Bazaar | React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS | GitHub | Live Demo

August 2025

- Built a full-stack student marketplace platform (Student Bazaar) using React, Node.js, Express.js, and MongoDB with JWT-based authentication and role-based access control.
- Implemented product lifecycle management features including posting, updating, and deleting listings, along with an admin-driven approval/rejection workflow for content moderation.
- Developed RESTful APIs and a responsive, user-friendly frontend with a clean UI, enabling seamless data flow and interaction between sellers and buyers through email and phone-based communication.

Hair & Scalp Disease Detection System | Angular, Flask, TensorFlow, EfficientNetB0 | GitHub | Live Demo

April 2026

- Developed a deep learning-based image classification system using CNN and EfficientNetB0, achieving 98–99% validation accuracy for multi-class hair and scalp disease detection.
- Built a full-stack ML pipeline with a Flask REST API and Angular frontend, enabling real-time image upload and prediction display, along with personalized recommendations (medications, and precautions, diet etc).

Medical Image Analyzer | React.js, Tailwind CSS, Gemini API, Clerk Authentication | GitHub | Live Demo

April 2025

- Built an AI-powered medical analysis system leveraging the Gemini API for image-based disease insight extraction, prediction, and treatment recommendations. It also check for the progress in health through multi image upload
- Implemented secure authentication using Clerk and developed a responsive React.js interface with optimized API integration for real-time inference and seamless user interaction.

Technical Skills

Languages: C, C++, Python, Java, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, Angular, Tailwind CSS, Bootstrap

Databases: MongoDB, MySQL

Tools: Git, GitHub, VS Code, Vercel, Render

Achievements

- Ranked Top 6 / 120+ participants in Infosys Hackathon focused on UI-to-code conversion and debugging challenges.
- Winner of WorthyHack Hackathon conducted by Cacheho for an innovative full-stack solution.
- Solved 450+ LeetCode problems with a highest LeetCode rating of 1574.
- Achieved 2-star rating on CodeChef with a highest rating of 1482.

Certifications

- Full-Stack Web Development – Udemy
- Python Essentials – Cisco Networking Academy
- Relational Database Systems – edX
- Git and GitHub Essentials – Udemy
